WHO WE ARE

Established in 2020, Bee Coders is a digital services company dedicated to craft unique, custom digital solutions that truly make an impact. With a focus on innovation and a commitment to excellence, we specialize in delivering digital products and experiences that redefine industry standards and set our clients on a path to digital success. Since its establishment, Bee Coders has been cultivating a corporate culture centered around Flexibility, Support, Quality. These principles represents the very essence of the companie's core values.

How to apply

The **J**ridge

Choose a topic

Select one or two subjects from the available topics, ensuring to note the exact reference.

fill out the form

- To proceed with your application, please fill out the form below. This form will collect your personal information, relevant web development links, and other details necessary for us to assess your fit for the internship program.
- Form Link :[
<https://forms.gle/mk3gWBa2asojGjRC9>]

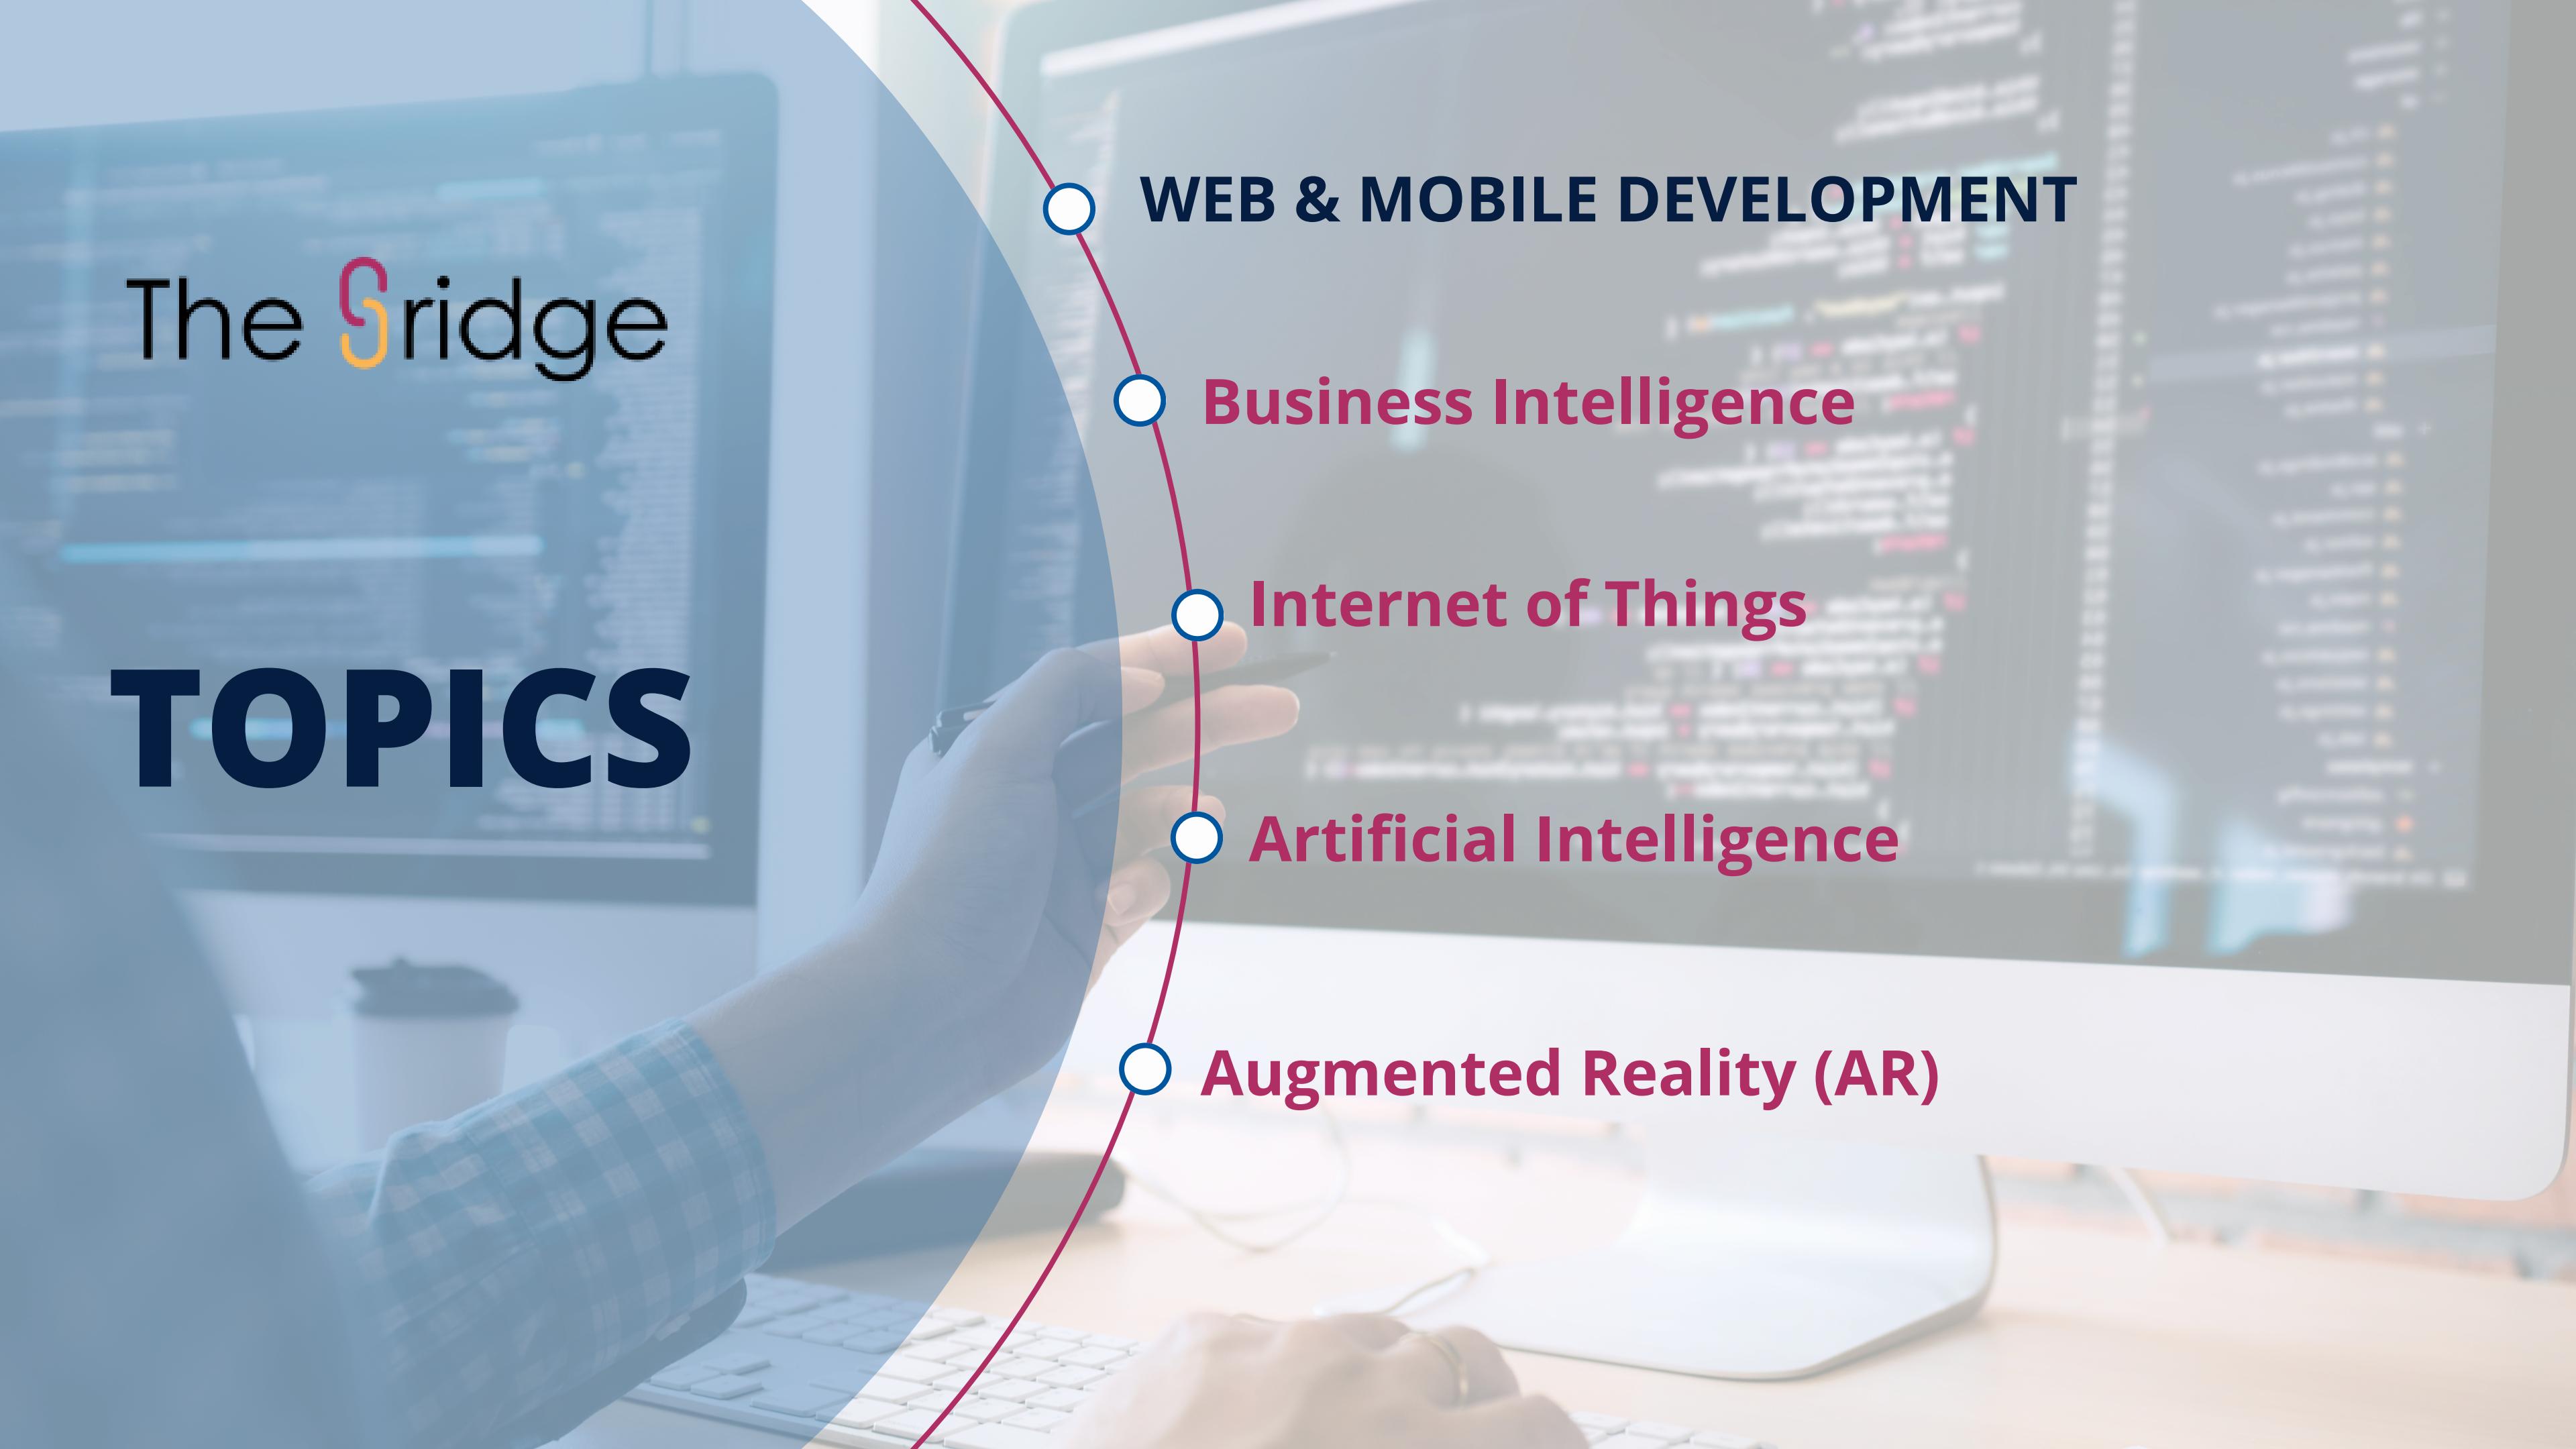

Interviews

This includes an initial HR phone call, followed by technical and HR interviews.

TOPICS

WEB & MOBILE DEVELOPMENT

Business Intelligence

Internet of Things

Artificial Intelligence

Augmented Reality (AR)

Project 1

WEBSITE GENERATOR

Building a "user-Friendly Website Builder" that enables anyone, regardless of their level of technical expertise, to create websites directly from their smartphones. This responsive web development tool simplifies the process of designing and launching websites, making it accessible to a broad user base.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 2

Pay at Table QR Solution

a system that allows restaurant customers to quickly pay by scanning a QR code at their table. They can view the bill, select a payment method, and complete the transaction without waiting for the server. This solution enhances the customer experience by streamlining payment processes and helping restaurants manage transactions more efficiently.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 3

Female Safe Digital Community

online platform designed to empower women socially and professionally by creating a safe space for connecting around shared interests. This inclusive environment encourages women to share experiences, access resources, and support one another. Features may include professional training, support groups, and networking opportunities tailored specifically to address women's needs and concerns.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 4

: Interactive and Responsive Online Shop Showcase

develop an online storefront, allowing merchants to present their products in an interactive and attractive way. This showcase includes a product catalog organized by categories, an advanced search system with filters, and a customizable interface to adapt to the merchant's visual identity. It is also optimized for smooth navigation on all types of devices (computer, tablet, mobile).

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 5

WafR

WafR is a mobile wallet designed for small informal merchants in emerging markets. It helps them offer financial services and increase their profit margins by enabling digital transactions with customers. Merchants can open an account on the app, and customers can pay by scanning a QR code. This simplifies payments, promotes financial inclusion, and gives merchants easy access to financial services.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 6

SOCIAL MEDIA PLATFORM FOR INFLUENCERS

Developing a social media platform for Influencer leveraging their online presence to not only engage with their audience but also to generate revenue.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 7

IT NEWS AND EVENTS PLATFORM

Developing a website that gathers IT news and events in Tunisia. The website can serve as a valuable resource for the IT community in Tunisia, keeping them informed about the latest news, events, and developments in the field.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 8

BABYSITTING PLATFORM

The babysitting platform aims to connect busy parents with trustworthy babysitters, providing a reliable solution for childcare needs. Parents can browse a list of qualified babysitters based on their availability, location, and specific needs. Babysitters can create profiles showcasing their experience, certifications, and skills. Features include real-time booking, reviews, and secure payment options to ensure ease and safety for both parties. The platform serves as a secure and convenient way for parents to find vetted childcare professionals and for babysitters to find job opportunities.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 9

EVENT MANAGEMENT CRM

This CRM for event planners simplifies managing registrations, attendee communication, vendor coordination, and feedback collection, making event organization more efficient and enhancing the attendee experience.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 10

SOCIAL MEDIA PLATFORM FOR INFLUENCERS

Developing a social media platform for Influencer leveraging their online presence to not only engage with their audience but also to generate revenue.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 11

GYM ACCESS CONTROL SYSTEM

Develop a CRM for fitness centers to handle membership management, class scheduling, personal trainer bookings, and fitness progress tracking for clients and create a secure and convenient gym access control system using facial recognition technology. This system allows registered gym members to enter the facility by simply showing their face to a camera.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

1 or 2
interns

Project 12

RESTAURANT MENU DISPLAY APPLICATION

A solution that introduces a designed system for showcasing restaurant menus through QR codes scan with comprehensive details, including descriptions and prices, diners can make informed choices.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 13

BOOKS AND READING PLATFORM

Developing a solution to elevate reading experience and collect community of reader. It offers a range of features to enhance the reading journey offering reading time tracker, book marketplace, reading reminders, Badges system for motivation and challenges.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

1 or 2
interns

Project 14

QR CODE BUSINESS CARD GENERATOR

Developing an application designed to simplify and modernize the exchange of contact information. It offers a convenient way for individuals and professionals to create digital business cards that can be easily shared with others via QR codes.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 15

E-LEARNING LANGUAGE PLATFORM SERVICE

Developing an e-learning platform/application that serves as a dynamic alternative to language learning services like Cambly. This platform is specifically designed to connect individuals eager to learn different languages in real time with experienced, professional/ natives , creating an engaging and effective learning experience.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 16

CAR SALES AGENCY PLATFORM WITH QR CODE INFORMATION RETRIEVAL

Developing a responsive platform designed to streamline car sales agencies operations by providing a convenient way to store and access information for each vehicle they have for sale. Customers visiting the agency can effortlessly retrieve information about a car by simply scanning its QR code

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 17

TRANSPORTATION SERVICES

Developing a responsive platform that brings together transporters and users seeking transportation services. This app streamlines the process by suggesting suitable transporters based on the journey details and quantity of items to be transported. It also provides estimated prices and facilitates the creation of formal quotations (devis).

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 18

CONTENT PROPOSITION AND SOCIAL MEDIA AUTOMATION

Developing a platform to assist individuals and businesses in efficiently managing their social media presence by offering content suggestions and automating content posts.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 19

PAID SURVEYS AND MARKETING VIDEO VIEWING

Developing a platform to facilitate direct marketing efforts by offering users the opportunity to participate in paid surveys and watch marketing videos. It serves as a direct marketing tool for businesses to reach their target audience and gather valuable insights.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 20

HR PLATFORM: STREAMLINING THE ENTIRE HR PROCESS

Developing a platform for Human Resources to automate and streamline the entire HR process. It offers a wide range of features to enhance HR management, from recruitment and filtering v's automatically to interviewing online .

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 21

TRAVELER'S CONNECTION APP

Developing social app to bring travelers together, enabling them to connect with like-minded individuals, explore thrilling destinations, share their travel stories, and discover exciting activities and experiences. Additionally, the app suggests tour guides for solo travelers and facilitates group travel coordination.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 22

LOCAL FOOTBALL MATCHUP PLATFORM

Developing a platform to bring together people in the same area who have a shared passion for playing football. It provides an interface for individuals to create football groups, organize matches within the platform, and decide on the location and timing of these games.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 23

RESPONSIVE ELDERLY ASSISTANCE PLATFORM

Developing a platform that provide comprehensive support and assistance to the elderly, catering to their various needs and enhancing their quality of life. The platform offers a wide range of features to address physical, emotional, and social well-being for seniors.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

1 or 2
interns

Project 24

PLATFORM CONNECTING LEARNERS WITH TRAINING CENTERS

Creating a platform that connects learners with training centers and educational services where Learners can found all trainings in one place in addition to booking or enrolling in training programs directly through the platform without the need to access for each center individually.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

1 or 2
interns

Project 25

Crowdfunding platform

Creating a platform where users can start and support projects, with sharing options and contribution tracking.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 26

Property Rental Management System

Creating A platform that helps manage real estate rentals with features for managing payments, contracts, and communications between tenants and owners.

Required skills

Spring Boot - Angular

React Js - Node Js

Flutter

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The **J**ridge

Software engineering

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2

Project 8

Smart Home Alarm System Description

A connected alarm system based on ESP32, using motion (PIR) and magnetic sensors to detect intrusions, with an audible alarm and real-time notifications via application or SMS.

Integrated with IoT platforms, it allows to monitor and manage security remotely.

Required skills

ESP32

PIR motion sensors, magnetic sensors

Buzzer et indicateurs LED

Développement d'applications

MQTT or cloud-based IoT integration

The  Bridge

**IoT, Smart Home,
Security**

TOPICS

WEB & MOBILE DEVELOPMENT

Business Intelligence

Internet of Things

Artificial Intelligence

Augmented Reality (AR)

Project 1

AI-Personalized Book Recommendation Platform

A website that suggests books based on reading habits, preferences, and current interests, using natural language processing (NLP) to analyze user reviews and trends.

Required skills

- Python
- React
- Node JS
- Machine Learning
- MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 2

AI-Powered Story Generator

A site where users provide a theme, setting, or character, and AI generates a short story, offering variations to inspire writers

Required skills

Python

React

Node JS

Machine Learning

MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 3

Smart Shopping Assistant

mobile app serves as a personalized shopping assistant by recommending products based on user purchase history, preferences, and shopping trends. By analyzing data on user behavior and preferences, the AI suggests items that align with individual tastes, seasonal trends, and past purchases. This helps users discover relevant products and streamlines their shopping experience.

Required skills

- Python
- React
- Node JS
- Machine Learning
- MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 4

AI-Based Image Recognition for Plant Disease Detection

This application assists farmers by allowing them to capture images of their plants and instantly receive diagnostics about possible diseases. The app analyzes the uploaded photos to detect common plant diseases and provides treatment recommendations. It aims to help farmers address plant health issues early, minimizing crop loss and optimizing yield.

Required skills

- Python
- React
- Node JS
- Machine Learning
- MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 5

AI-Enhanced Recipe Recommendation App

This app recommends recipes based on ingredients users have at home, dietary preferences, and health goals. Users can scan or input ingredients, and the AI generates recipes that utilize them. Additionally, users can track their nutritional intake with meal logging, and the app provides insights to improve their diet.

Required skills

- Python
- React
- Node JS
- Machine Learning
- MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 6

Automated Resume Builder

A website where users input career data and job preferences, and AI helps craft customized resumes and cover letters, enhancing keywords and design for specific job postings.

Required skills

- Python
- React
- Node JS
- Machine Learning
- MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 7

Automated Real Estate Price Estimator

A website where users input career data and job preferences, and AI helps craft customized resumes and cover letters, enhancing keywords and design for specific job postings.

Required skills

Python
React
Node JS
Machine Learning
MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2
interns**

Project 8

AI-Powered Virtual Fitness Coach

A site that creates personalized workout plans based on user input (fitness goals, body type, injuries) and provides real-time form correction and progress tracking using computer vision.

Required skills

Python

React

Node JS

Machine Learning

MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Project 9

AI DRESSING RECOMMENDATION SYSTEM

Building an online dressing allowing users to incorporate their own clothing items into the platform by taking photos of their clothes, this makes it easier to plan their outfits based on their existing wardrobe. Aditionnaly to developing a recommendation system that suggests what to wear based on factors like weather, event, mood, and personal style preferences.

Required skills

Python

React

Node JS

Machine Learning

MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

The  Bridge

Artificial Intelligence

From 4 to 6 months

Iac 1 ,Tunis \ remotely

**1 or 2

Project 10

REVOLUTIONIZING MALL SHOPPING EXPERIENCE

Developing solutions to enhance the mall experience, helping users discover stores and get their directions, uncover exclusive deals, and stay updated on upcoming events.

Required skills

- Python
- React
- Node JS
- Machine Learning
- MySQL

Each project is versatile and you have the possibility to customize it and add a business intelligence or devops automation or artificial intelligence part according to your needs.

Augmented Reality (AR)

Project 1

AR for Interactive Children's Books

This app brings printed children's books to life, using AR to animate characters and scenery when viewed through a mobile device. Kids can watch stories unfold and interact with characters, creating a blend of physical and digital storytelling.

Project 2

Personalized Home Visualization with AI and Augmented Reality

This app allows users to visualize furniture, decor, and other home items within their physical space using augmented reality (AR). Users can scan their room to create a digital model and then place items virtually to see how they look before buying. An AI component learns user preferences based on past selections and shopping behavior, suggesting items that match their style, room dimensions, and budget.

Project 3

AR Educational Game for Learning Languages

AR app enhances language learning by overlaying translations on real-world objects. Users aim their phone at items (e.g., "table" or "apple"), and the app displays translations, pronunciation, and example sentences. Gamification elements encourage daily practice and reward learning milestones, helping users retain vocabulary in an immersive way.
