

INTERNSHIP OPPORTUNITIES BOOK 2025-2026

*We're looking for talented and
creative minds to join the
innovation journey!*

ABOUT US

Our Digital Future (ODF) is a pan-African end-to-end support structure for startups and deeptechs originating from Tunisian research laboratories since 2016. ODF specializes in three main areas:

- The development of innovation ecosystems
- The maturation and acceleration of technology transfer
- The development of public policies related to innovation

We are committed to streamlining and democratizing the intellectual property valorization process while addressing the lack of industrialization services. Our mission is to foster a strong entrepreneurial culture among researchers and to create sustainable projects like TECHNORIAT that lead to innovative SMEs, startups, and deeptechs. ODF connects five key sectors: Public Policies, Industry, Investment, Businesses and Startups, and Research and Innovation, working together to drive long-term economic growth and technological advancement.

May Innovation be with you!
